What is AFCEA?

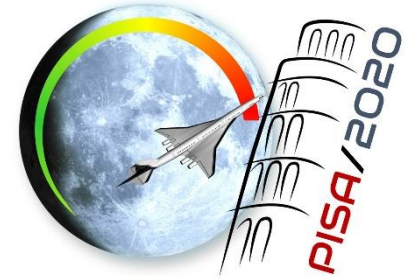

Where industry expertise meets government needs

AFCEA provides a forum for military, government and industry communities to collaborate so that technology and strategy align with the needs of those who serve.

AFCEA is a non-profit international organization that has helped members advance information technology, communications and electronics capabilities since 1946.

6th Military Metrology for aerospace 22 Jun 2020

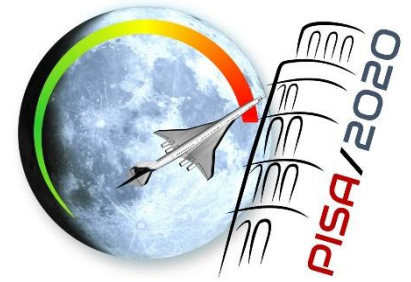

The association is structured in 140 chapters and has:

- More than 31,500 individual members
- 1,639 corporate members
